Teorema 1: Pythagoras teorema

In a right triangle, the square of the hypotenuse is equal to the sum of the squares of the catheti.

$$a^2 + b^2 = c^2$$

In mathematics, the Pythagorean theorem, also known as Pythagoras theorem (see theorem 1), is a relation in Euclidean geometry among the three sides of a right triangle.

Motivación

Esta sección¹ describe qué factores han hecho al estudiante decantarse por trabajar en éste y no en otro tema. Las imágenes se pueden, y se deben, citar y referenciar. Más aun, cuando se han sacado de internet. En este apartado se hablará de las imágenes extraídas online, que se referencian en estilo de: figuras, imágenes y/o tablas. También se tratarán las imágenes extraídas de redes sociales como Twitter, Instagram o YouTube.

¹A veces esta sección se denomina *justificación*, aunque *motivación* está más extendido. Suspendisse vel felis. Ut lorem lorem, interdum eu, tincidunt sit amet, laoreet vitae, arcu. Aenean faucibus pede eu ante. Praesent enim elit, rutrum at, molestie non, nonummy vel, nisl. Ut lectus eros, malesuada sit amet, fermentum eu, sodales cursus, magna. Donec eu purus.

Vertical farming has 3 main cropping systems:

- **Aeroponics** This system aims to place the crop is suspended in the air, therefore, irrigation is done by a mist or spray containing the necessary minerals and nutrients, which is supplied directly to the roots. **Hydroponics**. For this, the roots remain submerged in water, or a liquid solution containing the nutrients it requires, plus the water must always be in motion. **Aquaponics**: The system is similar to the previous one, with the difference that in this one not only plants are cultivated, but also aquatic animals are raised. The animal waste is used as fertilizer for the plants, since the water where the animals live is filtered and irrigated for cultivation.

Another of this company's strengths is LED lighting. AeroFarms has focused on specialized lighting software, where the algorithm is customized for each plant, providing them with exactly the spectrum, intensity and frequency of light they need for photosynthesis. With this set of lights, the size, shape, texture, color, flavor and even nutrients of the plants can be optimized. (**AeroFarm2**)
